1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 10-12 and 21-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Liu (6,005,694).

Liu discloses optical switch (260) including ports; a light source (T); a light detector (R) and control circuit (208) connected to the optical switch.

The control circuit comprises node identification. The control circuit causes the light source to send the node identification via a port of the optical switch. Each port of The node is identified with a port identification. The light source is connected to a first port of the optical switch for sending optical signal to identify the optical node. (column 5, lines 8-15 and column 6, lines 31-41).

3. Claims 6-9 and 13-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
